

Zia **Insight for Ephesoft** is an application monitoring software add-on for Ephesoft that provides detailed reporting and metrics on the performance of your Ephesoft Intelligent Document Capture system. With Insight for Ephesoft, you will be able to monitor the classification and data extraction correction processes and optimize them for improved efficiencies and increased return on investment (ROI).

The detailed reporting that **Insight** provides allows both IT and managers to identify potential bottlenecks during the capture process and fine tune the system's classification and extraction rules and thresholds to help reduce the number of manual corrections required. The easy to use graphical interface allows users to view high level performance metrics and drill down into specific batch instances or to individual documents to view the correction details.

The Technology:

Ephesoft Intelligent document Capture works by training the system to understand a company's documents so that they can be properly assembled, classified and have the correct fields extracted. As a document is goes through the system, information is extracted and a workflow process begins to approve and validate the information. The goal is to reduce the need for manual corrections to the data.

To do this, **Insight** monitors Ephesoft's performance over time and captures information about the correction process in order to identify where potential bottlenecks may be. As a result you can quickly fine tune the system for maximum performance and increased ROI.

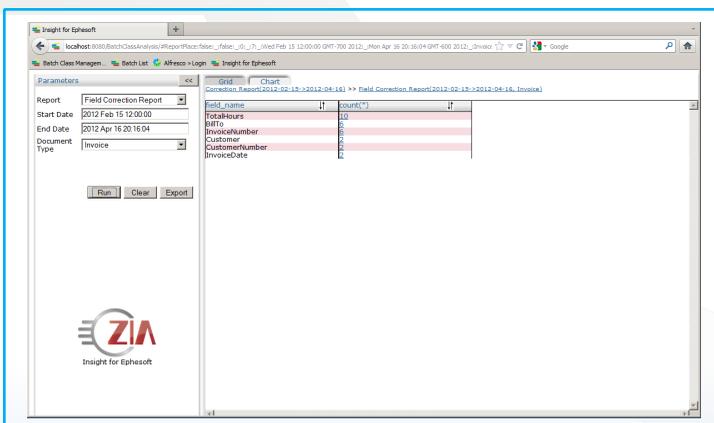

Features:

- Easy to use graphical interface
- View high level performance metrics
- Drill down into specific batch instances or to individual documents to view the correction details

Document classification and Data extraction correction reports available in Zia Insight for Ephesoft:

- Document Corrections
- Field Corrections
- Classification Corrections
- Separation Corrections
- Unnecessary Reviews
- False Positives
- Batch Corrections

- Configurable reporting interval
- Can run on its own server for enhanced performance in large scale deployments
- Maintains its own data base for performance

“It is extremely important to measure every system from efficiency and accuracy in the organization so that administrators and business analysts can find the bottlenecks and improve the system to its potential.

Zia consulting has developed "Insight for Ephesoft" to do exactly that, quickly and efficiently. Every system needs improvement and the improvement can only be accomplished using the right reporting tools. I would like to congratulate Zia for developing state of the art advanced reporting for Ephesoft called "Insight for Ephesoft". Every Ephesoft installation can benefit from these reports and increase their ROI even more.”

Ike Kavas, CTO Ephesoft

Ephesoft Intelligent Document Capture

The emergence of intelligent document capture (IDC) solutions now make document capture easier by automatically classifying, separating, sorting and extracting data from documents in paper, fax and electronic formats. Companies can train the IDC system to recognize different document types and extract information into metadata forms or tags.

Open source systems such as Ephesoft make intelligent document capture affordable for all organizations and easy to scale. Ephesoft helps cut automation costs by up to 90% compared to proprietary systems. With no click charges, the system allows companies to grow the implementation to meet future needs.

Zia's IDC Professional Services

- Integrated end-to-end content capture and management solutions
- Development and deployment of document capture technologies
- Ephesoft customization
- Implementation of document scanners
- Application support and training
- Integration with other business applications

Look to the Content People at Zia

Zia Consulting is a leading provider of enterprise business **solutions for content management from paper to mobile.**

When you are looking for content-centric solutions for your enterprise, you need to work with the right people. People who are driving Enterprise Mobility technology, experts in Enterprise Integration and Cloud Ready solutions. People who will connect you with industry leading partners and technology. People with a proven track record of delivering measurable business results, on time, within budget. The right people are the Content People at Zia Consulting. Zia is an organization of Content People, providing innovative solutions and opening up new possibilities in a content anywhere environment.

Partnering with industry leading open source technology providers allows Zia to provide their clients with the benefits of content management solutions that conform to the needs of your business and to your budget.

Content anywhere, solutions here.
